My dotfiles

These are my dotfiles.

To use them somewhere else, clone this repo (into, say, `~/dotfiles`), then symlink to the dotfile(s) you want.

I stole some of this from other places, and while I've mostly tried to provide attribution, there may be places I've missed. The rest of this is likely to be mostly uncopyrightable; if I have made any significant contributions, consider them MIT licensed, because MIT is bae.

Test lol.

To do

- [ ] Resolve (or document) dependencies
- [ ] Organise things better
